

# Industrial Access Components

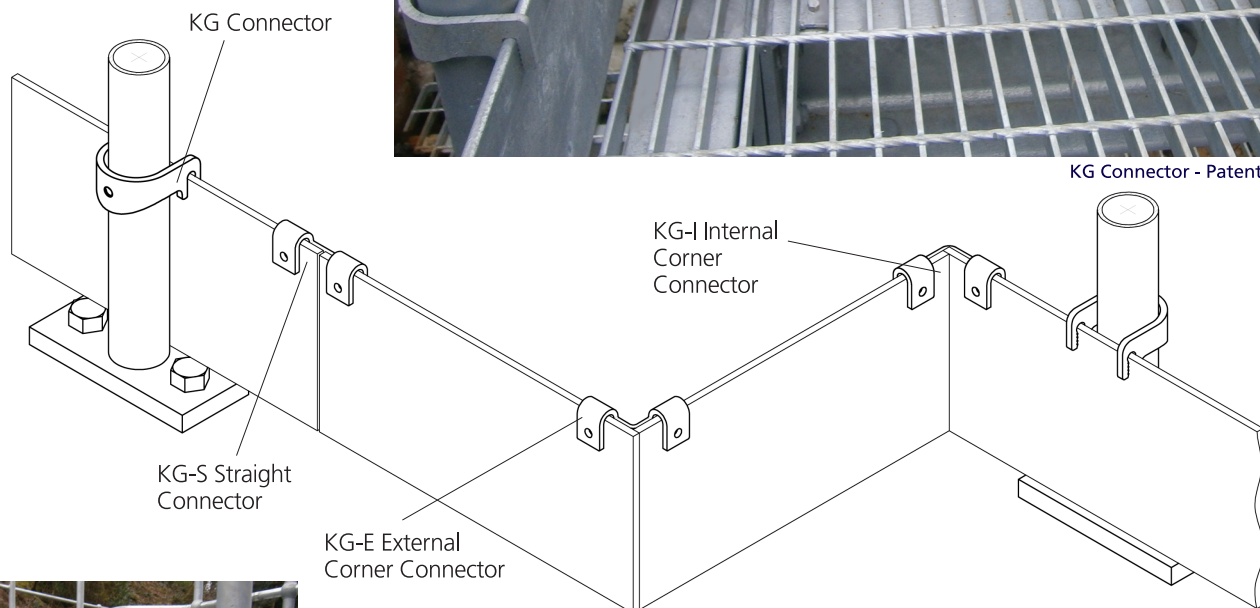

## • Kick-Grip Connectors

A fast, versatile and efficient method of fixing Kick-flat / toe-board on site. Kick-grip fixings enable the connection of independent kick-flats to handrail posts without the need of drilling or additional fixings such as U bolts.

Straight connectors and internal and external corners are all used to make up a complete continuous system, that is both robust, compliant and easy to fit.

KG Connector - Patent Pending

- All connectors are made to suit specific Handrail post sizes, ensuring a bespoke specific fit
- All tube post sizes catered for including solid shank 32, 38 and 40mm diameter

- Re-usable
- No drilling required
- Available in either galvanised or stainless steel finishes
- Adopted in water authority asset standards
